17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Encountered difficulty in running 7 7/8" bit into csg stub at 2702'. Re-dressed lead lined csg bowl and re-ran 8 5/8" csg to 2708' Tied onto existing csg stub. Ran collar log and confirmed that 8 5/8" csg is continuous across the patched interval. Could not run pressure test.

Nippled up hydraulic blind and pipe rams to compose stack. Verbal permission from George Stewart, USGS, Roswell, to not use annular preventor. Confirmed by telephone, 15 Sept. '81.

As of 6:00AM Monday, 15 Sept. '81, we were drilling patchy cement at 4200 ft.
