Apache Corporation proposes to return well to production from Temporarily Abandoned status. We will enter the well bore and drill out CIBP @ 5325'. We then plan to cement squeeze the perforations from 5375'-5416' (Paddock). We will then drill out CIBP @ 5810' and acidize perforations from 5912'-5966'. We will finally install production equipment in order to complete the well.
