HOBBS, NEW MEXICO 88241-1980  
(505) 393-6161

SUBJECT: Division Order R-9696

Gentlemen:

According to the provisions of Division Order R-9696, effective June 1, 1992, the vertical limits of the Hobbs-Blinebry Pool are contracted.

The HOBBS-LOWER BLINEBRY POOL is created, with the upper limit to be 6203 feet as defined by the Gamma Ray-Neutron Log run May 29, 1969.

The Hobbs-Lower Blinebry Pool is created with temporary special rules which include the following:

- a> A standard proration unit to consist of 80 acres.
- b> A well to be located within 150 feet of the center of a governmental quarter/quarter section.
- c> A depth bracket allowable of 222 barrels of oil assigned to a standard proration unit.
- d> A limiting G-O-R of 2000 cubic feet of gas per barrel of oil.

Your State A Well No. 5 located in Unit A of Section 32, Township 18 South, Range 38 East, is classified as producing from the newly created Hobbs-Lower Blinebry POOL.

We request that you submit a new Form C-102, dedicating a standard 80 acre proration unit to the State A Well No. 5.

Please amend your records to show this change in pool designation.

Very truly yours

OIL CONSERVATION DIVISION
