*Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty-day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

NOTE: If the proposed multiple completion will result in an unorthodox well location and/or a non-standard perforation unit in one or more of the producing zones, then separate application for approval of the same should be filed simultaneously with this application.

NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, M. R. Dillon, being of lawful age and having full
Name of party making report
knowledge of the facts hereinbelow set out do state:

That I am employed by Shell Oil Company in the capacity of
Production Foreman, that on October 7, 19 69

I personally supervised the setting of a Baker Lok-Set
Make & type of packer
in Shell Oil Company, Grimes,
Operator of well *Lease name*

Well no. 9 located in the Hobbs-Drinkard, Hobbs-Blinebry field,
Lea county, state of New Mexico, at a subsurface depth of
6200' feet, said depth measurement having been furnished me by

G. C. Teague - Lease Foreman;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
