State G #6 *F-33-18-38*
Temporary Production Plans - Blinebry/Lower Blinebry
Lea County, New Mexico

As per our conversation of 12/21/92, Amoco Production Company plans to temporarily produce the State G #6 well in the Lower Blinebry and what we believe to be a leaking perforated zone in the Upper Blinebry. This well is located 1980N x 1650 W (F-33-18-38).

Upon completion of this test, Terry Caldwell of Amoco Production Company will contact Jerry Sexton with results and conclusions. If additional information is required, please contact Terry Caldwell at (713) 584-7286.

Yours very truly,

Terry Caldwell
Engineer
