State G #6 Recompletion Test *F-33-18-38*
Hobbs Drinkard
Lea County, New Mexico

Amoco Production Company has tested the above mentioned well and has determined that the gas rate from this well would be uneconomical to produce. This well will be shut in until further recompletion potential has been evaluated.

We appreciate your flexibility in allowing us to test this well and wanted to respond promptly with our results.

Yours very truly,

Terry Caldwell
Engineer
