

## Development Plan For Surface Use

Re: West Corbin ~~888~~ #1  
Sec. 18-18S-33E

1. Existing Roads (See Map)
2. Planned access to location (See Area Map)
3. Offsetting Pool Wells (None) (See Ownership Map)
4. Lateral Roads to location (None) (See Map)
5. Tank battery and flow lines will be installed on drilling pad after well is completed.
6. See area map. Only fresh water supply in area is aqueducts as shown. No surface and very little subsurface water in area. Drilling water will either be purchased from aqueduct or transported.
7. Drilling contractor will be required to comply with OSHA requirements. There will be a burn pit for trash and junk disposal.
8. Not applicable
9. Not applicable
10. See drill site exhibit
11. The location will be restored to the satisfaction of the Bureau of Land Management.
12. This area consists of small sand dunes, shinnery, scrub mesquite bushes, and small patches of grass. The drilling of this well will not adversely affect the environment.
13. Blow-out prevention equipment will be 3000 and 5000 psi working pressure listed according to industry standards. (See exhibit)
