Re: Dual Completion
Petroleum Development Corporation
McKay-West Federal #1 (Bone Spring & Morrow)
Section 34, T-18S, R-32E
Lea County, New Mexico

Dear Sir:

Petroleum Development Corporation hereby applies for public hearing to authorize dual completion of our McKay-West Federal #1 in the Bone Spring (oil) and Morrow (gas) zones. The two zones were potentialed on June 17, 1975, and July 11, 1975, respectively.

The captioned well will be completed through two strings of 2-3/8" OD EUE tubing, using packers to separate the Bone Spring and Morrow zones as shown in the diagrammatic sketch. The well is currently shut-in pending pipeline connection and installation of the proposed dual completion equipment. The nearest Morrow completion is approximately 2-1/4 miles east-northeast in Section 25 and the nearest Bone Spring oil well is approximately 3 miles due south. There are no similar dual completions in the area.

Attached are three copies of an Application for Multiple Completion (Form C-107) and exhibits called for by Form C-107 setting forth all material facts pertinent to this application.

Yours very truly,

Charles W. Sanders
Vice President
