

1. No. 3 well located 1650' from the South and 330' from the East of Section 28, Township 18 South, Range 32 East, Lea County, New Mexico. If productive, other wells will be drilled on this lease.
2. As noted on map, tank battery will be the existing battery presently used for Wells No. 1, 2, 3, 4, and 5. This battery is located on pad of Well No. 1. Production will be co-mingled with different Federal lease.
3. There is no water supply on lease and water will be hauled. Any produced brine water will be hauled away and disposed of.
4. All waste materials as listed in No. 7 will be hauled off or buried in the pits. Trush and junk will be buried in a separate trash pit and covered with 24" of soil.
10. See plat for location layout. Since this is a rotary rig there will be water tanks and pipe racks. A small water tank will be on location for cementing. Small pad for location as shown approximately 100' by 175'. Rig will be on north edge of pad with mud pits just north of the rig.
11. Surface will be put back to near original contour when well is completed as producer or plugged.
