13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

In compliance with Bureau of Land Management letter dated August 14, 2000, we plan to resume production from the Federal CST Well No. 2 from the original completion zones through overall casing perforations from 3014' to 3662'.

With the present high level of activity in the petroleum industry, arrangements for services and equipment requires considerable advance planning and waiting.

In view of this situation, we anticipate having this well back on production during January, 2001.
