

GENERAL OPERATING COMPANY  
711 COMMERCE BUILDING  
FORT WORTH, TEXAS 76102

FEDERAL CST WELL NO. 2  
1650' FSL AND 2310' FEL  
SECTION 31-T18S-R32E  
LEA COUNTY, NEW MEXICO

ATTACHMENT TO APPLICATION FOR PERMIT TO DRILL  
DEVELOPMENT PLAN FOR SURFACE USE

- I. Existing Roads - Existing roads as shown on the attached topographic map will be used for access to the proposed location.
- II. Planned Access Road - Approximately 1,000 feet of 12-foot wide caliche road will be built from General Operating Company's Federal CST #1 Well located 660' FSL and 2310' FEL Section 31-T18S-R34E in a northerly direction to the proposed location.
- III. Location of Well - Proposed location of well is 1650' FSL and 2310' FEL (990' north of General Operating Company's Federal CST #1 Well) of Section 31-T18S-R34E approximately eleven miles south and two and one-half miles west of the townsite of Maljamar, New Mexico.
- IV. Lateral Roads to Well Locations - Additional roads to other well locations will be built prior to the commencement of actual drilling operations. Existing roads will be used where possible.
- V. Location of Tank Batteries and Flow Lines - If proposed well is successfully completed, a flow line will be laid in a southerly direction parallel to the road proposed under II above from the proposed well to the tank battery for Federal CST lease located in the SW/4 SE/4 of the referenced Section 31.
- VI. Locations and Types of Water Supply - Fresh water from commercial water company will be utilized to drill well.
- VII. Methods of Handling Waste Disposal - 50' x 100' reserve mud pit to be covered upon completion of well will be used for disposal of drilling mud and cuttings. Paper and other debris will be placed in 8' x 20' burn pit.
- VIII. Location of Camps - No camps are located in the area of the proposed location.
- IX. Location of Airstrips - No usable airstrips are in the area of the proposed location.
- X. Location Layout to Include Position of Rig, Mud Tanks, Reserve Pit, Burn Pit, Pipe Racks, Etc. - See Attachment.
- XI. Plans for Restoration of the Surface - All pits will be filled upon well completion and ground around location will be leveled with space allowed for well servicing.
- XII. Miscellaneous - No other known environmental information is applicable to this proposed location.
