

the entire area. Shallow deflation basins and low dunes interrupt the otherwise level terrain.

Floristics

Locally, the shrubs, Quercus havardii, Prosopis juliflora, and Artemisia filifolia dominate the landscape. Grasses include Aristida longiseta and Muhlenbergia porteri.

Cultural Resouces

No cultural resources were recorded during this reconnaissance.

Recommendations

ACA recommends clearance for the proposed drill location and access right-of-way and suggests that construction proceed without modification of existing plans.
