Re: Federal Com. 7 Lease, Well No. 2
Sec. 7, T-19S, R-33E
West Tonto Penn Field
Lea County, New Mexico

Gentlemen:

The above mentioned well has been completed as a gas well. We are in the process of testing. The well is perforated at 13,527-13,536' with two (2) shots per foot, total 18 holes and we have tubing set in the packer at 13,105'. We have set the tubing high so we may perforate higher in the Morrow zone at a later date, the top of the Morrow zone is 12,782'.

It is respectfully requested that the Commission grant administratively an exception to Inexco Oil Company to set the tubing higher than 250' above the perforations.

Yours very truly,

INEXCO OIL COMPANY

A. K. Gideons
