17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

A Bottom Hole Pressure Build-up Test was conducted during the period of 10/31 - 11/1/80. A review of all available engineering data indicates that the present perforations from 9386'-9453' has pressure depleted. This zone will be abandoned by setting a Cast Iron Bridge Plug at 9360' and capping it with cement. It is proposed to perforate and test three (3) additional intervals within the Upper Bone Springs.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
