HOBBS, NEW MEXICO

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

After receiving verbal approval from George Stewart, USGS, Roswell, proceeded with abandonment as follows: (1) CIBP capped with 35 linear feet of neat cement at 3175' (between 2 sets of perfs); (2) CIBP set at 2900' with 35 feet of linear of cement on top; (3) solid cement plug at 1550' to 1200'; and (4) 10 foot surface plug with dry hole marker. Plug 3 design was changed in the field after receiving telephoned instructions from Roger Chapman, USGS, Roswell. Originally scheduled a 100 foot plug for the interval 1500-1400. Well is now plugged and abandoned.

Subsurface Safety Valve: Manu. and Type N/A Set @ Ft.

18. I hereby certify that the foregoing is true and correct
