Lea

13. STATE

N.M.

14. API NO.

15. ELEVATIONS (SHOW DF, KDB, AND WD)

3729 G.L.

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

As of 6:00 AM CDST 24 August 1981, operations were as follows:
Well was on swab in attempt to record load from hydraulic fracturing. All fluid had been recovered except 36 bbls. gelled 2% KCL water. Oil cut was 10% with no gas. This amount of hydrocarbon had been present for last two days with no increase indicated.

Based on these results, this will serve as notice of intent to S.I. this well for evaluation with further action pending. The rig will be released when 20 bbls. load is left to recover with no change from present.
