PROPOSED CASING AND CEMENT PROGRAM

SIZE OF HOLE	SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	SACKS OF CEMENT	EST. TOP

The well is currently P&A. We propose to re-enter the well, drill out the cement plugs and clean out the well bore to it's original TD of 12,164' using a 7 5/8 bit.

A 10"-600 EOP will be set with blind and 2 7/8 rams after the casing is repaired and extended back to the surface.

We intend to pressure up on the casing to check for casing leaks prior to drilling out each cement plug. Otherwise, the procedures will conform to those ordered by the Energy and Minerals Department, Oil Conservation Division in CASE NO. 8817 Order No. R-8166 (copy attached).

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: IF PROPOSAL IS TO DEEPEN OR PLUG BACK, GIVE DATA ON PRESENT PRODUCTIVE ZONE AND PROPOSED NEW PRODUCTIVE ZONE. GIVE BLOWOUT PREVENTER PROGRAM, IF ANY.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
