Re: Harvard #1-0 31-18-39
Foster San Andres Pool - Casinghead Gas Overproduction

Gentlemen:

Your proposal to produce the above-referenced well at a reduced rate and to have the overproduction eliminated within a 6-month period is acceptable to the Hobbs District Office.

However, I must remind you that it is your responsibility to monitor the gas production and not allow this excessively overproduced status to occur again.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I

RE: Harvard #1
Foster San Andres Pool

Attn: Jerry Sexton

Dear Sir:

In response to our conversation on October 14, 1987, pertaining to Anadarko's over-production of gas exceeding the Commission assigned daily gas limit for the Foster San Andres Pool; we will cut back on daily production of gas on this well until over-production has been taken care of to fall within legal pool limit. This over-production will be satisfied within given six month period. In the future, every effort will be made to keep gas production within daily allowable. Thank you for your consideration of this matter.

Sincerely,

A handwritten signature in cursive script, reading "Howard D. Hackett". The signature is written in dark ink and is positioned above the printed name.

Overproducing Top Casinghead Gas Limit
Foster San Andres Pool

State of New Mexico
Energy and Minerals Department
Oil Conservation Division
P. O. Box 1980
Hobbs, New Mexico 88240

Attn: Jerry Sexton, Supervisor and
Oil and Gas Inspector

Gentlemen:

Phillips 66 Natural Gas Company's records indicate the Anadarko Petroleum Corporation operated Harvard Well No. 1 in the Foster San Andres Pool is overproducing the Commission assigned daily gas limit. Our purchase records show the Well No. 1 to have produced at a daily average of 840 MCF per day in June, 892 MCF per day in August, and 921 MCF per day in September, 1987. The top casinghead gas limit for the Foster San Andres Pool is 800 MCF per day.

Phillips respectfully requests the Oil Conservation Division contact Anadarko Petroleum Corporation to have their overproduction made up and to maintain their daily production rate at the allowed 800 MCF per day rate.

Sincerely,

L. M. Sanders, Agent
Phillips 66 Natural Gas Company
