13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Effective March 1, 2001, Seely Oil Company (Seely) acquired the Working Interest under a group of wells in the Mescalero Escarpe: Bone Spring Field located in Lea Sounty, New Mexico from 3TEC Energy Corporation. Seely assumed operations of these wells on May 15, 2001.

The Mescalero Ridge B Federal #2, a temporarily abandoned Bone Spring well, is one of these acquired wells that Seely has been directed to activate of plug by the BLM.

Besides the Bone Spring, there are other re-compleat possibilities in this well bore. In order to make an intelligent recommendation to other Working Interest Owners under this well, Seely needs time to make a detailed study of all potential under this well in order to make necessary recommendations and agreements with these non-operating Working Interest Owners.

Therefore, Seely requests an extension of time to comply with this activate or plug regulation until July 1, 2002.
