Re: French 36 State #1-D
Sextion 36, T18S, R32E

Gentlemen:

It is noted on Form C-103 submitted March 15, 1988, that you perforated the above-referenced well 8544--8849' which our Geologist indicates will be in the Upper Bone Spring. If this zone is productive you will need to file a recompletion for the Querecho Plains Upper Bone Spring.

To produce from both the upper and the lower Bone Spring in the Querecho Plains Field will require approval of a multiple completion or authority to downhole commingle.

If you have further questions, please feel free to contact us.

Very truly yours,

OIL CONSERVATION DIVISION
