Re: Recompletion from Vacuum Middle Penn to Vacuum Abo Reef Pool  
New Mexico AB State TN #9-P  
Section 6, T18S, R35E

Gentlemen:

We have approved your intention to recomplete the above-referenced well to the Vacuum Abo Reef Pool with the stipulation that the well cannot be produced from the Abo Reef formation until you have obtained approval from our Santa Fe office for the unorthodox location.

This well is unorthodox for the Vacuum Abo Reef Pool because it is nearer than 330 feet to the #2 well which produces from the same pool. (See Rule 104 C I).

You should be able to obtain administrative approval of this unorthodox location for the Vacuum Abo Reef completion since the well was permitted as a Vacuum Middle Penn well at a standard location for that pool.

Please submit this application as soon as possible to our Santa Fe office with a copy to the Hobbs Office.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I
