13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BLA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Effective March 1, 2001, Seely Oil Company (Seely) acquired the Working Interest under a group of wells in the Mescalero Escarpe: Bone Spring Field located in Lea County, New Mexico from 3TEC Energy Corporation. Seely assumed operations of these wells on May 15, 2001.

The Caviness 10 Federal #1 was unsuccessfully tested in the Bone Spring and was plugged back to test the Queen sand. Initial tests of the Queen were not successful, but the well was not plugged and abandoned pending further testing of the Bone Spring and/or Queen.

In order to make an intelligent recommendation to other Working Interest Owners under this well, Seely needs time to make a detailed study of any possible potential of the Bone Spring and/or Queen in the area of the well before abandoning the well.

Therefore, Seely requests an extension of time to comply with the activate or plug regulations of the BLM until July 1, 2002. The well has been tested to satisfy previous temporary abandonment requirements.

14. I hereby certify that the foregoing is true and correct
