Dear Jerry:

Reference is made to the captioned well, the oil overproduction, and our conversation in your office Wednesday, August 17, 1988.

Woodbine requests one year until August 1989 to make up for overproduction which has accrued to this well. We would appreciate having six months in which to evaluate the well and the producing reservoir. At the end of six months, provided the overproduction has not been made up, we will submit a plan to adjust the production of said well over the next six months until the accrued overproduction adjustment has been accomplished.

Thank you and your staff for your cooperation.

Sincerely,

WOODBINE PETROLEUM, INC.

Don G. Shackelford
Executive Vice President
