Dear Mr. Sexton:

Bass Enterprises Production Co. requests permission to produce the subject well such that we underproduce the present gas allowable of 160 MCF per day. (2000 scf/bbl times 80 BOPD). We plan to reduce the normal production by approximately 100 MCF gas per day. This underproduction will continue until the overage is made up. We estimate that the underage will be made up in approximately 100 days.

If you should have any question, please contact Mr. John R. Smitherman at the letterhead address.

Very truly yours,

George A. Teer
Division Production Manager
