RE: CORRECTING OF POOL DESIGNATION
Nowata AGR State #2-I
Sec. 9, T-18S, R-35E

Gentlemen:

On July 23, 1993 the Nowata AGR State #2-I was placed in a Wildcat Bone Spring Pool. After more research by our Geologist, he finds that this well is located and producing from the Mid Vacuum Bone Spring pool. We need a C-104 form showing the correct pool so we may notify your transporters. A plat showing the dedicated acreage for the Mid Vacuum Bone Spring pool is needed too. Please send these forms to the Oil Conservation Division, P O Box 1980, Hobbs NM 88241.

If you have any questions on this matter, please call Donna Pitzer at District I office (505) 393-6161.

Yours very truly,

OIL CONSERVATION DIVISION

Jerry Sexton
District I, Supervisor
