1780' FNL & 760' FWL, Sec. 35, T19S, R32E

Lea County, New Mexico

Dear Mr. May:

The referenced gas/oil well is located in the Secretary of the Interior's Potash Area as described by 1986 Secretarial Order and was previously approved on September 8, 1993, with two one-year extensions approved on October 13, 1994, and September 14, 1995. On August 30, 1996, Carlsbad Resource Area received a third request from Yates Petroleum Corporation to extend the Application for Permit to Drill (APD) approval for another year.

This APD Extension was evaluated using all the current information and data available, rather than with data from September, 1993, when the original APD was approved. Since the original APD and subsequent extensions were approved, the status of the area with respect to potash mine plans and lease applications has changed significantly. Because Part III.A. of the 1986 Secretary's Order directs the authorized officer to take into consideration the applicable rules and regulations of the Oil Conservation Division of the State Of New Mexico, due consideration was given to the designation of a new Life of Mine Reserve submittal per the State's Order R-111-P, part G(3) and part D(1).

Regrettably, your request for another one year extension to drill the well must be denied and the original approval is hereby rescinded. Drilling at the proposed location would likely interfere with future potash mining and result in undue waste of potash. In the future, it

potash mining and result in undue waste of potash. In the future, it could also prove hazardous to the health and safety of potash miners.

Your copies of the application are being returned. By using the enclosed 1842-1 Form, this decision may be appealed to the Interior Board of Land Appeals in accordance with 43 CFR 3165.4.

Please contact our Carlsbad Resource Area Office Solid Minerals Staff at (505) 887-6544 should you have questions regarding alternative locations or need other assistance on matters involving potash mining.

Sincerely,

Frank Splendoria
