13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

An area wide geologic and engineering review of the Bone Spring formation is currently in progress. At the conclusion of this study, if economic conditions permit, this well will be recompleat. If recompleat cannot be economically justified, it is planned to plug and abandon the well. It is anticipated that the study will require 3 to 6 months to complete, and another 3 to 6 months to execute the recompleat program. It is requested that a Temporarily Abandoned status be granted to this well for 1 year.
