RE: Correcting API Number

Gentlemen:

Per telephone conversation with Juanel Harper and Donna Pitzer of the District I Hobbs office on the Tonto Federal #2-I, Sec. 12, T-19s, R-32e with API #30-025-32277. The Bureau of Land Management canceled this intent to drill on Nov 1994.

Intent to drill this well was resubmitted and approved Jan 1995. With the same operator and same location it was over looked and put with the previous BLM Paper work, but the ONGARD System will not accept this. So at this time we are assigning API #30-025-33590.

This letter is to correct all forms filed since the well was drilled. Also to notify the operator of the new number so that production can be reported correctly on the C-155 and to the BLM.

If you have any questions on this matter, please call the District I, Hobbs office (505) 393-6161.

Yours very truly,

OIL CONSERVATION DIVISION

Jerry Sexton
