

- G. Cuts and Fills: None require
- H. Gates or Cattle guards: None required
3. Location of Existing Wells:
- A. Existing wells within a two-mile radius are shown on exhibit "B".
4. Location of Existing and/or Proposed Facilities:
- A. If the well is productive the tank battery and flow line will be located on the well pad and no additional surface disturbance will occur.
5. Location and type of Water Supply:
- A. Water will be purchased and trucked to wellsite over the existing roads.
6. A. Caleche for surfacing the road and the well pad will be obtained from existing pits in the area.
7. Methods of Handling Waste Disposal:
- A. Drill Cuttings will be disposed of in the drilling pits.
- B. Drilling fluids will be allowed to evaporate in the drilling pits until pits are dry.
- C. Water produced during test will be disposed of in drilling pits. Oil produced during test will be stored in test tanks until sold.
- D. Current law and regulation pertaining to disposal of human waste will be complied with.
- E. All trash, junk and other waste material will be contained to prevent scattering and will be removed and disposed in an approved sanitary landfill.
8. Ancillary Facilities:
- A. None required
9. Wellsite Layout:
- A. Topography: Arid desert with elevation of approximately 3700'.
- B. Soil: Soil is deep fine sand with underlain by caleche.
- C. Flora and Fauna: The vegetative cover is generally Shinnery and Mesquite.
- D. Ponds and Streams: There are no rivers, lakes, streams, or ponds in this area.
- E. Residence and other Structures: None in the area.
