13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Seely Oil Company's McElvain Federal Well No. 7 was drilled and completed during October-November, 2000 from the Upper Queen through perforations from 4482' to 4490'.

Production facilities for this well are located in the NW/4 of the NW/4 of Section 29, T18S, R34E, NMPM.

Since Seely Oil Company could not obtain a meter connection to sell casing head gas produced from this well in a reasonable length of time and to prevent waste of this natural resource, a temporary line was installed to an off-lease Conoco gas line located in the SW/4 of the SW/4 of Section 20, T18S, R34E, NMPM. The casing head gas produced from McElvain Federal Well No. 7 is being delivered to Conoco at this off-lease location.
