13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The subject well has reached a total depth of 13550'. We had mudlog shows in the Delaware, Bone Spring, Strawn and Morrow. We DST'd the Morrow show 13170'-240' and deemed this zone non-commercial. We have been unable to get logs or drillpipe below 13220'. Our plan is to plug back and DST the Strawn. If the Strawn is Commercial we will run casing to 12400'. If non-commercial we would plug back to 6100' and run a liner from 5000'-6100'.

1. Spot Cement Plug 13220'-13000'. (Morrow)
2. Spot Cement Plug 12700'-12400'. (Atoka)
3. DST the Strawn 12115'-12342'.
4. If Strawn is commercial, run 5 1/2" casing to 12400' and cement in two stages.
If Strawn is not commercial, a procedure will follow to plug back to 6100' and complete in the Delaware.
