DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We will set approximately 75 feet of 15 3/8" casing, approximately 700 feet of 10" casing, and approximately 1500 feet of 8 3/8" casing. We will set 7" casing through the pay and cement to the surface, pull all outside casing, and complete the well through perforations. We will drill to test the Yates-7 Rivers pay encountered at approximately 3500 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
