The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to set 60-100' of 9-5/8" od casing and cement to top.  
Drill 8-3/4" hole to approximately 3525' and set 7" od seamless casing with rotary tools. In event production is obtained 7" casing will be two-staged to protect salt section. Cable tools will be used to drill into pay section. In the event that the base of the salt is encountered log geologically, the well will probably be abandoned at that point. Possible pay expected is the Seven Rivers 3550'-3560'.

Confirms verbal conversation with Mr. Jack Frost.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
