DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose using rotary tools for the entire hole. Propose setting 350' 8-5/8" casing and cementing to top of hole. In the event commercial oil or gas is found will run 5 1/2" casing to top of pay or bottom of hole and either cement to top of salt or two stage with lee sacks at bottom and 100 sacks at top of salt. Will furnish either sample description or electric log.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
