(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Artesia, NM April 9, 1952
Well No. (Harbert A14) is located 300 ft. from N line and 900 ft. from E line of sec. 22
36 22 18S 33E
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Santa Fe La New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill with rotary tools to top of salt (about 1500') set 8" casing and cement with 50 sacks cement; then propose drilling with cable tools to the expected pay at about 3550'. If oil is encountered, intend cementing 7" at top of pay with 100 sacks cement. If the well is a producer and it is decided to pull the 8", the 7" will be cemented with enough cement to run back up to the top of the salt.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
