(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Herbert Aid
Well No. #2 is located 1220 ft. from N line and 660 ft. from E line of sec. 22
SE 22 19S 33E NMPM
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Tonto Lea County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3640 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to set 90-100' of 8-5/8" OD Casing and cement to Top.
Drill 7-7/8" Hole to approximately 3560' and Set 5-1/2" OD Casing
with Rotary Tools. In event production is obtained 5-1/2" Casing
will either be two staged or sufficient cement used to cement
back to top of Salt.

Note: This is an unorthodox location as approved by the New Mexico
Oil Conservation Commission, as per Case 536, Order R-325
under date of 5/26/53

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
