(Field)	(County or Subdivision)	(State or Territory)

The elevation of the derrick floor above sea level is __3635__ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Our Notice of Intention to Abandon this well was approved by your office 11-9-44. We now request permission to complete this well as a fresh water well to be used in connection with our development and operations in this area.

To complete as a water well, we will plug the lower part of the hole exactly as outlined in our approved Intention to Plug; however, instead of pulling all possible 8-5/8" casing and spotting plugs above and below water sand at 700±810', we will leave all 8-5/8" casing in the well and perforate into this water sand.

Above confirms telephone conversation and approval of your office on 11-16-44.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
