FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well was completed July 21st, 1938, with an initial Gas Oil Ratio of 680. On September 6th, 1939, this well ceased flowing and was dead until November 18th, 1939, when the tubing was run with 10 Merla Flow Valves, and the well put to producing. However, the well will not flow steadily or satisfactorily without a small volume of injected gas.

We, therefore, desire permission to inject sufficient gas to flow this well. The additional gas will be secured either from our State of New Mexico "L" Well No. 1 or "M" Well No. 1.
