DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

This well was drilled to a total depth of 1540 feet and 8-5/8" casing was run to a total depth of 1520 feet. After testing for casing shut off, and when going back into hole to drill cement plug, it was found that the pipe had collapsed at 600 feet, and in trying to roll same out it collapsed at 300 feet. A bridge was set at 290 feet and the hole pumped full of cement. We have skidded the rig 20 feet East and as soon as the rotary rig is moved off we will set the marker required.
