

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF	<input checked="" type="checkbox"/>	NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL			

Sundown, Texas

Place

July 4, 1944

Date

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Devonian Oil Co. State Lease Well No. 1 in SE 4 SW 4  
Company or Operator Lease  
of Sec. 32, T. 17, R. 34 E, N. M. P. M., Vacuum Field,  
Lea County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Tested casing with 900# pressure for 30 minutes, tested o.k., July 4, 1944.  
Witnessed by Ray Hughes, Tool Pusher for Mishcon Drilling Co.

Approved JUL 8 1944, 19\_\_\_\_  
except as follows:

"APPROVAL CONDITIONED UPON  
COMPLIANCE WITH REQUIREMENTS  
OF OPC-WFB."

HOW MUCH INFORMATION IS THERE IN THEM

which is the same

THE FIRST PART OF THE BOOK

The first part of the book is a general introduction to the subject of information theory. It discusses the basic concepts of information, entropy, and the relationship between information and communication. The author also discusses the importance of information theory in various fields, including engineering, physics, and biology.

THE SECOND PART OF THE BOOK

The second part of the book is a detailed discussion of the mathematical foundations of information theory. It covers topics such as the definition of entropy, the properties of entropy, and the relationship between entropy and the amount of information. The author also discusses the concept of mutual information and its applications in communication systems.

The third part of the book is a discussion of the applications of information theory. It covers topics such as the design of communication systems, the analysis of communication systems, and the use of information theory in cryptography. The author also discusses the relationship between information theory and other fields, such as statistics and probability theory.

The fourth part of the book is a discussion of the future of information theory. It covers topics such as the development of new information theory, the application of information theory to new fields, and the relationship between information theory and other fields.

THE FIFTH PART OF THE BOOK

The fifth part of the book is a discussion of the relationship between information theory and other fields. It covers topics such as the relationship between information theory and statistics, the relationship between information theory and probability theory, and the relationship between information theory and other fields.

The sixth part of the book is a discussion of the importance of information theory. It covers topics such as the role of information theory in the development of communication systems, the role of information theory in the analysis of communication systems, and the role of information theory in other fields.

THE SEVENTH PART OF THE BOOK

The seventh part of the book is a discussion of the future of information theory. It covers topics such as the development of new information theory, the application of information theory to new fields, and the relationship between information theory and other fields.

The eighth part of the book is a discussion of the relationship between information theory and other fields. It covers topics such as the relationship between information theory and statistics, the relationship between information theory and probability theory, and the relationship between information theory and other fields.

THE NINTH PART OF THE BOOK

The ninth part of the book is a discussion of the importance of information theory. It covers topics such as the role of information theory in the development of communication systems, the role of information theory in the analysis of communication systems, and the role of information theory in other fields.

The tenth part of the book is a discussion of the future of information theory. It covers topics such as the development of new information theory, the application of information theory to new fields, and the relationship between information theory and other fields.

The eleventh part of the book is a discussion of the relationship between information theory and other fields. It covers topics such as the relationship between information theory and statistics, the relationship between information theory and probability theory, and the relationship between information theory and other fields.

The twelfth part of the book is a discussion of the importance of information theory. It covers topics such as the role of information theory in the development of communication systems, the role of information theory in the analysis of communication systems, and the role of information theory in other fields.

THE THIRTEENTH PART OF THE BOOK

The thirteenth part of the book is a discussion of the future of information theory. It covers topics such as the development of new information theory, the application of information theory to new fields, and the relationship between information theory and other fields.

The fourteenth part of the book is a discussion of the relationship between information theory and other fields. It covers topics such as the relationship between information theory and statistics, the relationship between information theory and probability theory, and the relationship between information theory and other fields.

The fifteenth part of the book is a discussion of the importance of information theory. It covers topics such as the role of information theory in the development of communication systems, the role of information theory in the analysis of communication systems, and the role of information theory in other fields.

The sixteenth part of the book is a discussion of the future of information theory. It covers topics such as the development of new information theory, the application of information theory to new fields, and the relationship between information theory and other fields.
