DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Well was cleaned out and formation washed and re-acidized. Work started in January 1953. Considerable difficulty was encountered in recovering the acid water which seems to be completely recovered now. The well was finally pumped on bottom for several weeks to accomplish this. April 15, 1953, the pump was raised to pump above the pay zone. Also, at this time the pump was reconditioned. The present production indicates the re-work improved the production about 35%.
