OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico

Gentlemen:

Following is a notice of intention to do certain work as described below at the

The Texas Company's State of New Mexico "V" Well No. 6 in SW1/4 SW1/4  
Company or Operator Lease

of Sec. 34, T. 17-S, R. 34-E, N. M. P. M. Vacuum Field.

Lea County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

TD : 4700 -Line

On Production Test ending 12-1-50, well pumped 0.7 bbls oil and 67 bbls water in 24 hrs.

The well was re-acidized to increase production on 12-1-50. During the acid job, the casing developed a leak at 1778, allowing water to enter the well. The leak should be repaired and the well re-acidized.

We desire to enter well and set drillable bridging plug at 1900' and squeeze hole in casing with 50 sack batches of cement until a stable pressure of 1000 pounds is obtained. Drill out cement and bridging plug, test casing and clean out to total depth. Set packer at 4150 and acidize with 3000 gals, Swab acid residue from hole and return well to pumping status.
