The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ran 328 feet of 13-3/8" OD 54.5# casing set at 345' with 300 sacks of common cement- circulated out approximately 75 sacks of cement. Plug down at 3:00 P.M. on December 11, 1949.

Tested casing with 1400# pressure for 30 minutes- no pressure drop. Waited on cement 48 hours- drilled plug 3:00 P.M. on December 13, 1949. There was no cement on inside of casing- the plug was pumped down against top of float collar.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
