RE: LEA "K" STATE #1, UNIT L, S36-19S-R34E
TEXAS STATE #1, UNIT G, S36-T19S-R34E

Gentlemen:

The above referenced plugged well sites have recently been inspected by an Oil Conservation Division (OCD) Representative, in an attempt to release the locations.

As a result of these inspections, both locations were found to not comply with the minimum requirements of OCD Rules and Regulations.

The following items need to be completed before the locations can be released.

LEA K STATE #1 (L):

1. Cut bolts off of pump jack base.
2. The location needs to be levelled.

TEXAS STATE #1 (G):

1. Down hole marker needs to be corrected, should read S36-T19S-R34E.
2. Location should be clear from all junk, (plastic).

When the above items have been done, please contact Ray Smith at (505) 393-6161, so that we may proceed in releasing these wells.

Very truly yours,

JERRY SEXTON
District I Supervisor
