On Nov. 19, 1949, 8 5/8" OD New 28# H-40 casing was set at 1805', and cemented with 75 sacks around the casing shoe. Then a string of 1" pipe was run to a depth of 250' on the outside of the casing, through which 125 sacks of cement was circulated from that point back to surface. The rotary rig was moved off the location. Cable tools are ~~now~~ moved onto the location, and we propose to drill the cement plug and test for water shut-off on about January 17, 1950.
