OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

DUPLICATE

Following is a notice of intention to do certain work as described below at the Drilling & Exploration Co., Inc.  
Inc. State "A" Well No. 2 in SW-37  
 Company or Operator Lease  
 of Sec. 22, T. 17S, R. 35E, N. M. P. M., Vacuum Field,  
 County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

We wish to advise that our lease consisting of the South half of the SW quarter of Section 22, T-17S, R-35E is to be known as State "A" and therefore request that you change your records and the necessary reports which we have rendered in the past for wells No. 1 and No. 2 to read accordingly. The State "A" No. 1 well was completed August 29, 1938 and the State "A" No. 2 well is now being rigged up and should spud in today.

## ARTICLE IN BRIEF

The following article is a summary of the findings of the American Medical Association's Committee on the Medical Profession, which was organized in 1927 to study the medical profession and its relation to the public.

The committee's report, "The Medical Profession and the Public," was published in 1929. It is a comprehensive study of the medical profession, its history, its organization, and its relation to the public.

The committee found that the medical profession has a long and honorable history, and that it has made great contributions to the knowledge and practice of medicine.

However, the committee also found that the medical profession has become increasingly organized and self-regulating, and that it has become more and more of a closed shop.

The committee believes that this is a dangerous trend, and that it is essential that the medical profession be kept open to the public, and that it be subject to the same laws and regulations as other professions.

The committee's report is a valuable contribution to the study of the medical profession, and it is one that every physician should read.

The committee's findings are based on a thorough study of the medical profession, and they are supported by a large amount of evidence.
