LOG

Figure 1 is a line graph showing the number of cases of COVID-19 in the United States from March 2020 to March 2021. The x-axis represents time in months, and the y-axis represents the number of cases in millions. The graph shows a sharp increase in cases starting in March 2020, peaking in May 2020 at approximately 1.5 million cases, followed by a decline and then a second, larger peak in March 2021 at approximately 3.5 million cases. The data is represented by a solid blue line with markers at each data point.
