

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Date

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

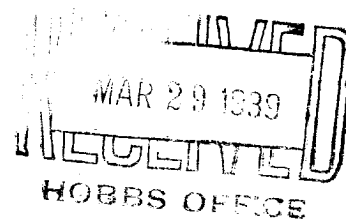

Following is a notice of intention to do certain work as described below at the Cities Service Oil CompanyState-KWell No. 2 in SENE

of Sec. 27, T. 17-S, R. 35-E, N. M. P. M., Vacuum Field,  
Lea County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Original plans for setting intermediate string of 8 5/8" casing were to set 1660' of 32# second hand pipe and cement with 600 sax cement with single stage cement job. Plans are now to set approximately 1660' of 8 5/8" 28# casing (second hand) and cement with two stage job using 150 sax at the bottom and again through multiple stage cementer at approximately 250' with sufficient cement to equal one and one half times the calculated annular space behind the 8 5/8" casing.

Approved MAR 29 1939, 19.....

The first part of the paper discusses the importance of the study and the objectives of the research. It also provides a brief overview of the methodology used in the study.

### 2. Literature Review

The literature review section provides a comprehensive overview of the existing research on the topic. It identifies the key findings and gaps in the literature.

### 3. Methodology

The methodology section describes the research design, data collection methods, and the statistical analysis used in the study.

#### 3.1. Data Collection

The data for this study was collected through a series of interviews and surveys conducted over a period of six months.

The results of the data collection are presented in the following table:

#### Table 1: Summary of Data Collection Results

The table shows the distribution of responses across different categories, highlighting the key findings of the study.

The findings of the study indicate that there is a significant correlation between the variables studied. The results suggest that the proposed model is effective in explaining the phenomenon under investigation.

The study has several limitations, including the sample size and the scope of the research. Future research should aim to address these limitations.

The conclusion of the study is that the research objectives have been achieved.

The authors would like to thank the following individuals for their support:

The study was funded by the following organizations:
