

NEW MEXICO OIL CONSERVATION COMMISSION

FORM C-103
(Rev 3-55)

MISCELLANEOUS REPORTS ON WELLS

(Submit to appropriate District Office as per Commission Rule 1106)

Name of Company Standard Oil Company of Texas A Division of California Oil Company		Address Boxer "S", Monahans, Texas				
Lease State 4-27	Well No. 1	Unit Letter K	Section 27	Township 17 South	Range 35 East	
Date Work Performed See below	Pool Vacuna	County Lee				

THIS IS A REPORT OF: (Check appropriate block)

- ☐ Beginning Drilling Operations ☒ Casing Test and Cement Job ☐ Other (Explain):
☐ Plugging ☐ Remedial Work

Detailed account of work done, nature and quantity of materials used, and results obtained.

1. Moved in, rigged up pulling unit.
2. Hipped up blow out preventer.
3. Pulled tubing and packer. Ran retrievable bridge plug and hook-wall packer. Tested 7" casing with 1500 psi satisfactorily from 4137 ft to 631 ft. Above 631 ft., had slow decrease in pressure. Pumped down 10-3/4" x 7" annulus with 7000 psi at 1/4 barrel per minute. No fluid returns or pressure build up from 7" x 5-7/8" annulus. Diagnosed as pin hole gas leak in 7" casing but not of sufficient size to permit cement specking.
4. Pulled packer and bridge plug. Ran production tubing. Installed pumping equipment. placed on production May 5, 1962. Tubing landed at 4575'.

A Division of California Oil Company

1. The first part of the document discusses the importance of maintaining accurate records of all transactions.

2. It is essential to ensure that all data is entered correctly and that the system is updated regularly.

3. The second part of the document outlines the procedures for handling customer inquiries and complaints.

4. It is important to respond to customers promptly and to provide them with the information they need.

5. The third part of the document describes the various methods used to collect and analyze data.

6. It is necessary to use a variety of techniques to ensure that the data is reliable and valid.

7. The fourth part of the document discusses the importance of maintaining the confidentiality of all data.

8. It is essential to implement strong security measures to protect the data from unauthorized access.

9. The fifth part of the document outlines the procedures for backing up the data and restoring it in the event of a disaster.

10. It is important to have a disaster recovery plan in place to ensure that the data can be recovered quickly and easily.

11. The sixth part of the document discusses the importance of maintaining the integrity of the data.

12. It is essential to ensure that the data is not altered or corrupted in any way.

13. The seventh part of the document outlines the procedures for monitoring the system and detecting any problems.

14. It is important to have a system in place to detect and respond to any issues as quickly as possible.

15. The eighth part of the document discusses the importance of maintaining the performance of the system.

16. It is essential to ensure that the system is running smoothly and that there are no bottlenecks or delays.

17. The ninth part of the document outlines the procedures for updating the system and adding new features.

18. It is important to have a plan in place for how to update the system and how to test the new features.

19. The tenth part of the document discusses the importance of maintaining the documentation of the system.

20. It is essential to have a system in place to keep track of all changes and updates to the system.

21. The eleventh part of the document discusses the importance of maintaining the security of the system.

22. It is essential to implement strong security measures to protect the data from unauthorized access.

23. The twelfth part of the document outlines the procedures for conducting regular security audits.

24. It is important to have a system in place to detect and respond to any security issues as quickly as possible.

25. The thirteenth part of the document discusses the importance of maintaining the availability of the system.

26. It is essential to ensure that the system is always available to the users and that there are no downtime or outages.

27. The fourteenth part of the document outlines the procedures for disaster recovery and business continuity.

28. It is important to have a plan in place for how to recover from a disaster and how to continue the business.

29. The fifteenth part of the document discusses the importance of maintaining the flexibility of the system.

30. It is essential to ensure that the system can adapt to changing requirements and that it can handle future growth.

31. The sixteenth part of the document discusses the importance of maintaining the scalability of the system.

32. It is essential to ensure that the system can handle an increasing number of users and transactions.

33. The seventeenth part of the document outlines the procedures for testing the system and ensuring its reliability.

34. It is important to have a system in place to test the system and to ensure that it is working correctly.

35. The eighteenth part of the document discusses the importance of maintaining the compatibility of the system.

36. It is essential to ensure that the system is compatible with all the hardware and software that it will be used with.

37. The nineteenth part of the document outlines the procedures for implementing the system and training the users.

38. It is important to have a plan in place for how to implement the system and how to train the users.

39. The twentieth part of the document discusses the importance of maintaining the support of the system.

40. It is essential to have a system in place to provide support to the users and to respond to any issues as quickly as possible.
