

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	<b>X</b>
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Hobbs, New Mexico

## Section 1: Introduction to the Project

1.1 Project Overview

1.2 Project Objectives and Scope

The project aims to develop a comprehensive system for managing project resources, including personnel, equipment, and materials. The scope of the project includes the design, development, and implementation of the system, as well as the training of users and the ongoing support and maintenance of the system.

The project is divided into several phases, including the initial planning and analysis phase, the design and development phase, the implementation phase, and the evaluation and feedback phase. Each phase has specific objectives and deliverables, and the project will be managed using a structured approach to ensure that all objectives are met and the system is implemented successfully.

The project team consists of a project manager, a systems analyst, a software developer, and a user representative. The project manager is responsible for overall project management, including planning, organizing, and controlling the project. The systems analyst is responsible for analyzing the requirements and designing the system. The software developer is responsible for developing the system, and the user representative is responsible for ensuring that the system meets the needs of the users.

The project will be managed using a project management plan that defines the project's goals, objectives, and scope. The plan will also define the project's organization, including the roles and responsibilities of the project team members. The project will be managed using a structured approach, including the use of project management tools and techniques to ensure that the project is completed on time and within budget.

The project will be evaluated and feedback will be collected from the users to ensure that the system meets their needs. The project will be managed using a structured approach, including the use of project management tools and techniques to ensure that the project is completed on time and within budget. The project will be managed using a structured approach, including the use of project management tools and techniques to ensure that the project is completed on time and within budget.
